SEP 01 1983

Fansteel, Inc.
ATTN: Mr. Gerald Wittbrodt
Dept. 476
Number One Tantalum Place
North Chicago, IL 60064

License No. 12-03236-02
Expiration Date: March 31, 1983

Gentlemen:

Subject: Notice of Violation

NRC records show that the Byproduct Material License identified above expired on March 31, 1983, and that no renewal application was filed in accordance with Section 30.37 of Title 10, Code of Federal Regulations, Part 30.

From our discussion with you on August 26, 1983, we learned that you still possess material which requires a specific NRC license. Your possession of that material without a valid, specific license is a violation of Section 30.3, 10 CFR Part 30.

If you want to continue your program, you must immediately submit the Form NRC-313, "Application for Byproduct Materials License" to the Regional Licensing Section, U.S. Nuclear Regulatory Commission, 799 Roosevelt Road, Glen Ellyn, Illinois 60137, Attention: Bruce S. Mallett, Ph.D.

Since your present license has expired, your application for renewal will be processed as a request for a new license. Accordingly, you must determine if your program is subject to a license fee as required by Section 170.31, 10 CFR Part 170. If so, submit the appropriate fee along with the application.

Also, you must place the radioactive material on hand in secure storage until such time as you acquire a valid license. No other use of the material on hand or purchase of additional byproduct material is authorized.

If you have any questions, please contact Rose Douglas at (312) 932-2735.

Sincerely,

D. G. Wiedeman, Chief
Materials Radiation Protection
Section 1
