Subject: NRC Questions on GA-ESI Qualification Report 04308800
Importance: High

All:

I got a phone message from Gush yesterday. His comment is that TUV test report S8569-02 (Appendix B to 04038800) appears to use earlier model numbers of equipment than those being used at WBN2. His specific need for this report is the qualification of the I/F converter which is not covered in TUV test report S7439-03 and does not appear to be included in the later Nemko report. Can GA-ESI confirm that the I/F converter tested in the TUV report is the same as that being used for WBN2? If not, what is the correct EMI/RFI test report for the WBN2 I/F converter? What specific items being used for the WBN2 RM-1000 monitors are part of the equipment under test in the TUV reports? Please provide the part numbers for the RM-1000, I/F converter and power supplies used in the WBN2 radiation monitors.

Thanks,

Steve
