Subject: Additional information for amendment request

(NOTE: This will be used as the
Documents Title in ADAMS)

NRC staff contacted the licensee to clarify the following information provided in a faxed response letter dated September 14, 2011:

The revised NRC Form 313A submitted for AU training and experience and preceptor attestation under the T&E pathway provides some conflicting information. The revised form indicates a request for individual authorization for each of the four categories under 10 CFR 35.300 uses and indicates 35.390, 35.392, and 35.394 under classroom and lab training, supervised case work experience, and preceptor attestation. The form also indicates a total of 139 hours for classroom and lab training.

The license reviewer explained that based on the information submitted, the proposed AU does not have the required 200 hours of classroom and laboratory training under 10 CFR 35.390, and there are no known clinical uses that fall under the fourth category under 35.390. Therefore, Dr. Grady will be authorized for "Oral administration of sodium iodide I-131" under 10 CFR 35.392 and 35.394.

Mr. Solge confirmed his awareness of the requirements and said that they will submit another request for additional authorized uses after Dr. Grady takes her board exam in October 2011.
