Hi Pat...

George and I looked at this issue and found static on the line. We moved this line onto a new cable pair and it sounds clear. I just spoke to NRC/lwo who stated the line is now working fine.

As a precaution I called in a ticket to Verizon. I suspect the trouble may be between the NRC's pbx and Verizon line (as the Verizon line is a home run into the NRC equipment).

I will keep you posted.

Martin

Pat:

I indicated to Mike Burney this morning that whatever IT did to repair our line 914-739-9360, it was unsuccessful. When you call the number, which I recommend you do just to see what we are talking about, it definitely has something going on there....

Also, thanks for your 4<sup>th</sup> sentiments...I had a blast...and I wasn't here!!!

And, was not sure if you were informed, but the monitors that need to be disposed of are still here...and thanks again, in advance, for your assistance.

**Subject:** Disposal of NRC Old Monitors

Hi Pat,

There are 5 boxes in our NRC office marked "DISPOSE - OLD MONITOR." I placed them on the small table across from my desk. Could you please arrange to have someone pick them up and dispose of according to your procedures.

Thank you!
