Categories: Salem Hope Creek

Charles,
This is my proposed addition to the FWS and NMFS letters. Please let me know if you have any edits before I send this to Caroline.
Dan

Caroline,

Please insert this text near the end of the letter, before the "Your office will receive a copy of the draft SEIS..." paragraph.

Please submit your comments regarding this project to the Chief, Rulemaking and Directives Branch, Division of Administrative Services, Office of Administration, Mailstop TWB 5B01M, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

For your information, an environmental site audit will be conducted on March 8, 2010.

Thanks,
Dan Doyle

Subject: 'Bio letter plan

Caroline,

Here's the plan to get the Salem Hope Creek bio consultation letters done:

1. Please make the editing changes (from Dennis Logan) to the Kurkul letter.
2. I will send you a blurb about the site audit and the address to submit comments to. Please add this to both letters (Scherer and Kurkul)
3. **Charles** will send you the updates to the service list. If that doesn't resolve the Wagner duplicate, Charles need to check with the licensee or RI to find out what Wagner's position is.
(http://www.pseq.com/about/executive_profiles/power.jsp)

4. Once this is done and those two letters are concurred and out the door, please send me the electronic version of the Scherer letter.
5. I will remove the ESA section 7 reference and change it to a generic NEPA reference for the state letters.
6. I will submit the state letters as a separate 665 for processing.
