AUG 12 2011

Thomas Killingsworth
Radiation Safety Officer
Michigan Department of Transportation
Materials and Technology Division
Secondary Governmental Complex
8885 Ricks Road
P.O. Box 30049
Lansing, MI 48909

Dear Mr. Killingsworth:

Enclosed is Amendment No. 42 to your NRC Material License No. 21-03039-01 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please note, we have authorized the InstroTek Model 3500 portable moisture/density gauge and the Michigan Department of Transportation facilities in Attachment A as requested in the letter dated July 28, 2011. However, the application dated July 25, 2011, references the older regulatory guidance document for portable gauges, NUREG-1556, Volume 1, so we did not update all of the items in your license document at this time. The current guidance document for portable gauges is NUREG-1556, Volume 1, **Revision 1**, dated November 2001 and can be found on the NRC website at <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v1/r1/>. If you wish to update the items in your license document, please use the new portable gauge guidance document, NUREG-1556, Volume 1, **Revision 1**, dated November 2001.

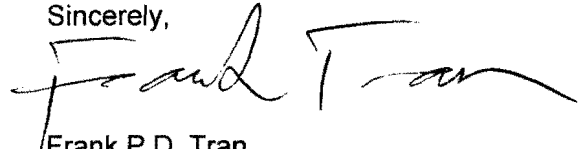

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

NRC's Regulatory Issue Summary (RIS) 2005- 31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>. A copy of this letter will be
