**Subject:** Chapter 8 - Biological Sections  
**Attachments:** Ch 8 (DB, AT).docx

Dennis, Richard:

It looks like everyone has their pieces in on Chapter 8 except for the biology, but fear not (isn't that a phrase that Zorro used to say right before he saved the damsel in distress?), I check the bio sections over and their really quite short and I believe mainly "boiler plated". Could you to review/edit these sections tomorrow and return any comments back to me by COB tomorrow?

We are freezing off your comments on Chapter 2/4 today i.e., what we see is what is what will be in the final SEIS. However, I would like both of you (time/resources sufficient) to keep working on the ch 2/4 with Steve so that by the time the final SEIS is ready to issue, the bio will be highly refined and defensible. Please feel free to contact me about this if you have any questions/etc.

Attached in the Chapter 8 that you can add your comments to tomorrow. Make sure your comments are in redline/strike out mode. Thanks for all tour help to date!!
