Leslie & Andy,

FYI, Briana has graciously offered to redo the formatting for the reference sections (I think AECOM had it in the wrong bibliographic format), so I showed where the files were.

Just a note to let everyone know regarding impact to version control. Let's notify each other when we go into each chapter so that we don't try to open & change the same file at the same time (even though you should still get the "read-only" warning).

Thanks!
