I have those numbers. Thanks. Have you heard anything about when the 2009 effluent report will be released? I have the 2009 Rad Env Operating Report.

The dose data is presented in the annual radioactive effluent release reports. The dose info is buried in the detailed effluent release data and is typically at the end of the curies released info. Be careful, the doses are sometimes reported in a quarterly format. Some plants report it two ways; quarterly and also for an annual summary.
There is no standardized format.

I provided you with the ADAMS accession numbers for the effluent reports as well as for the radiological environmental monitoring reports ages ago.

Let me know if you need me to resend them.

Steven:

Do you have the documents that present the S/HC off-site dose evaluations? Are they available on ADAMS?
