Send me the file when you have the clarifications (please put explanation in comment bubble). I'll call you after if I need additional info.
Thanks.

Bobbie,

Can you please set up the conference call me today instead of Leslie?
Thanks.

Importance: High

Bo,

I was having trouble getting on Citrix last night, so I was not able to work on DSEIS at home as I had planned. When I tried this morning I was able to get on. I will definitely plan stay late in office after training today to finishing resolving OGC comments. However, I do need help following up with Bobbie Hurley to resolve some of the comment. She sent me an email yesterday indicating that she could arrange for have conference the appropriate technical person to discuss the questions,, since I am training it will be hard for me do a conference call. If someone could follow up with her today, I would appreciate it. Attached is the version of Chapter 2 that I sent to her that includes OGC comments/questions. If we can get these comments resolved today, then I can make the changes this evening sent to Brian Harris. I will follow up with later this morning during one of my breaks.

Comment/questions are on pages 41, 93, 94, 100 in the attachment.

I will touch base with later this morning. My cell is (b)(6) Ex 10

Thanks,
Leslie
