Andy,

I found very few significant issues with the preliminary review of land use, socioeconomics, and EJ sections in draft Chapters 2, 4, and 8 of the Salem and Hope Creek SEIS. Overall, I think AECOM did a good job and followed the most recent draft SEIS template. Most of the fixes are relatively easy, can be made quickly, and reflect recent updates and changes in SEIS socioeconomic and EJ analysis in response to public comments (e.g., see response to Cooper and Duane Arnold EPA comments on EJ). I will provide Charles with a complete markup showing recommended changes in these chapters in the next few days. I will also be discussing these and other corrections with Susan Provenzano and others at AECOM.

Thanks,

jeff
