

October 24, 2011

Stephen Tarlton, Manager
Radiation Control Program
Hazardous Materials and Waste Management Division
4300 Cherry Creek Drive South
Denver, CO 80246

Dear Mr. Tarlton:

We have reviewed Colorado's "Colorado Radiation Control Act" contained in 25-11-101 through 25-11-305 received by our office on April 13, 2011. The legislation was reviewed by comparison to 10 CFR 40, "Domestic Licensing of Source Material"; 10 CFR Part 61, "Licensing Requirements for Land Disposal of Radioactive Waste"; and the Suggested State Legislation (SSL) on "Radiation Control," published 1983 by the Council of State Governments.

Please note that we have limited our review to program elements required for compatibility and/or health and safety and the identification of program elements that create conflicts, duplications or gaps in the orderly pattern of regulations on a nationwide basis (See the 1997 Policy Statement on Adequacy and Compatibility of Agreement State Programs). We note that Colorado became an Agreement State on January 1, 1968 and amended their Agreement to include Section 11e.(2) material of the Atomic Energy Act on April 20, 1982. During the negotiations for both the Agreement and the amendment to the Agreement, NRC reviewed Colorado's enabling legislation. We are unaware of additional reviews by NRC of changes to the Colorado enabling legislation since those reviews.

The Colorado legislation appears to loosely follow the SSL model legislation and the State has operated their agreement program under this legislation since becoming an Agreement State. Based on our review, we have some comments/concerns about the legislation in addition to the changes associated with revisions that occurred in 2002, 2003 and 2010 as noted below. We discussed our review of the legislation with James Jarvis on October 19, 2011.

We offer the following comments:

1. In 25-11-201-(3), Colorado Revised Statutes (C.R.S.), Colorado defines the term "Radioactive waste" which appears to encompass both high level and low-level radioactive waste. By defining this term in this manner, there appears to be duplication of regulatory authority with the inclusion of material not covered by the 274b agreement with Colorado and reserved to the NRC. Colorado does not have a specific definition for low-level radioactive waste, but does have a definition for waste found in Colorado regulations, 1.2.2 Definitions at <http://www.cdphe.state.co.us/regulations/radiationcontrol/index.html> which does meet the Compatibility Category B designation associated with the definition of "waste" in 10 CFR 61.2.

We recommend that the definition of “Radioactive Waste” in 25-11-201-(3) be revised to meet the Compatibility Category B designation assigned to the definition of “waste” in 10 CFR 61.2.

2. In 25-11-201-(1), Colorado defines a term “classified material” which is not used in the NRC regulation scheme. This definition appears to cause conflicts as it groups 11e.(2) material with the other materials that do not need to meet the additional requirements for 11e.(2) byproduct material under UMRCA and Part 40. Although Part 2, “Radioactive Waste”, 25-11-201 to 25-11-203, appears to apply to radioactive material, the rest of Part 2 appears to mix the terms radioactive waste with classified material as it lays out requirements for both low-level radioactive waste and uranium recovery facilities.

We recommend that the definition of “classified material” in 25-11-201-(1) be removed and that the legislation be revised and restructured to clearly incorporate the appropriate definitions and requirements from the Part 40 and Part 61 that Colorado is responsible for under the Section 274b Agreement.

3. Colorado has two definitions for the term radioactive. In 25-11-101(5), the definition means “emitting radiation.” In 25-11-201(2), definition means “emitting alpha rays, beta rays, gamma rays, high-energy neutrons or protons, or other high-level radioactive particles. The term “radioactive” does not include material in which the estimated specific activity is not greater than .002 microcuries per gram of material, and in which the radioactivity is essentially uniformly distributed.”

The last sentence of the second definition is inconsistent with the responsibilities and authority assumed by the State of Colorado under the 274b Agreement and appears to create a gap in the orderly pattern of regulations on a nationwide basis. We recommend that the second definition be revised or removed.

4. In 25-11-101 and 25-11-201, Colorado does not define byproduct, source or special nuclear material, although these terms are defined in Colorado regulations in at <http://www.cdphe.state.co.us/regulations/radiationcontrol/index.html> and meet the compatibility categories designations assigned to them. We recommend that Colorado consider adding these definitions to the legislation to clarify the materials covered by the Agreement.
5. In 25-11-109, Colorado’s legislation permits the issuance of provisional license by the Colorado Department of Public Health and Environment (the Department). The provisional license is issued if the Department has failed to issue or has denied a request for a license, or an amendment thereto, as authorized by 25-11-109, within 30 days of the date of receipt by the Department of a completed application made on the appropriate forms designated by the Department to a hospital as licensed or certified pursuant to section 25-1.5(1)(a)(I) and (1)(a)(II). These provisional licenses can be in effect for up to 180 days and apply only to licensed or certified hospitals when the purpose is to acquire, possess, and use radioactive material for diagnostic or therapeutic human use.

This is contrary to the requirement to issue licenses that have addressed health and safety requirements in the regulations and affects the adequacy of the State’s program under 274b. This provision needs to be removed from the legislation

6. In 25-11-110(4)(d), Colorado requires that the amount of a long-term care warranty shall be enough that, with the assumed six percent annual real interest rate, the annual interest earning will be sufficient to cover the annual costs of site surveillance by the Department, including reasonable administrative costs incurred by the Department, in perpetuity, subsequent to the termination of the radioactive materials license for that site. This is less restrictive than the provision in Part 40, Appendix A, Criterion 10, which assumes a one percent annual real interest. The 6% annual real interest rate will greatly underestimate the amount of funding necessary for the long term surveillance necessary to meet the Compatibility Category C designation assigned to Part 40, Appendix A, Criterion 10.

We recommend that you address the six comments above concerning the authority provided to the Department under the 274b agreement with NRC. Colorado may resolve some of these comments through revision or interpretation of State law. Although NRC will review all submittals to determine acceptability, NRC may accept interpretations provided by the State Attorney General, or other attorney designated as legal advisor to the radioactive materials program.

If you have any questions regarding the comments, please contact Kathleen Schneider, State Regulation Review Coordinator at 301-415-2320 (Kathleen.schneider@nrc.gov).

Sincerely,

/RA/

A. Duncan White, Acting Deputy Director
Division of Materials Safety and State Agreements
Office of Federal and State Materials and
Environmental Management Programs
