Whatever's most efficient for you and for incorporating the changes into the document. If you would rather do electronic, that's ok with me. Don't want to make more work for you than necessary.

Do you still prefer redline/strikeout or hardcopy markup?

Subject: Salem/Hope Creek Follow-On

First off, I thank everyone for your attention and efforts on Salem/Hope Creek this week. I have a few follow-on messages

- The overall directive is to "do the best you can with what you have" ... that's all I can ask. Towards that goal, I'd like the primary focus for the review staff to be taking a good, hard, skeptical look at areas where the contractor could be making a judgment call in favor of the applicant. Coming out of Tuesday, I feel that we didn't see egregiously malicious work ... but be vigilant in your reviews that the conclusions reached are based on sound logic and information.
- Please check the references to make sure that we are using the old (1996-1999) GEIS, and **NOT** the new GEIS.
- Staff working on SEIS review should charge evenly to ME1833, ME1835, and ME1847 for Salem 1, Salem 2, and Hope Creek, respectively. Staff observing for training/qual purposes should charge to the appropriate training TAC (for environmental-specific quals MD3374; MD3230 for general quals), or as directed by your branch chief.
- I believe everyone is working towards this anyways, but I'd like your sections by the end of the week.

Thanks so much everybody,

Andy
