FYI: I have never received one section.

Also, what I did see required a lot of work, and I guess now I am the only one to do it, so things might take a while.

Subject: Comments for Salem & HC DSEIS

Bobbie & Nicole,

Per our phone conversation last week, today is the day in which the NRC staff would provide the last of our comments to AECOM in order for you to meet a final draft delivery of 8/25/10 next week.

As I understand it, Dennis Logan's comments for the aquatic write-up should be the last comments you'll be getting. To ensure that we have discipline in our review process, **please vet all comments beyond today through me & Andy Imboden.** I'll confer with Andy to see whether the changes are substantive enough to be a show stopper.

This is all done to protect all interested parties in bringing their pieces to the table for this review & to have a deliverable from AECOM to us for concurrence by 8/25/10.

Thanks.

Bo Pham
