Subject:

Docket No. 50-482: Containment Inservice Inspection Program

Second Interval, First Period, Refueling Outage 18 Owner's

Activity Report

Gentlemen:

Enclosed is the Wolf Creek Nuclear Operating Corporation (WCNOC) Owner's Activity Report (Form OAR-1, Report Number WCRE-22, I2-P1-RF18) for containment inservice inspections performed prior to, and during, Wolf Creek Generating Station's (WCGS) eighteenth refueling outage (RF18) that concluded on June 24, 2011. RF18 was the second outage of the first period of the second interval of the WCNOC Containment Inservice Inspection Program. The enclosed report is submitted pursuant to the requirements of paragraph IWA-6240 of the 2001 Edition through 2003 Addenda of Section XI of the American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code and ASME Code Case N-532-4.

There are no commitments contained within this letter.

If you have any questions concerning this matter, please contact me at (620) 364-4175 or Ms. Diane Hooper at (620) 364-4041.

Sincerely,

Diane m. Hooper for

Gautam Sen

		information. The condition was	
		evaluated as acceptable.	
		Reference work order 10-	
		331498-001 and CCP 13427.	

Note 1: This condition was not service induced. The bolt and bolt chair members were bent during the process of removing the hatch cover to support outage activities. This damage was caused by personnel error. The subject components were determined to be acceptable for continued service by an engineering evaluation.

Note 2: This condition was not service induced. The tendon wires were damaged during the testing process. This damage was caused by an error of the vendor performing the testing. The subject components were determined to be acceptable for continued service by an engineering evaluation.
