

TABLE OF CONTENTS

Chapter

- 1.0 INTRODUCTION
 - 1.1 Operational Summary
- 2.0 CLASS EXERCISES
 - 2.1 Electro Hydraulic Control System Problems
 - 2.2 Core Heat Balance
- 3.0 TECHNICAL SPECIFICATIONS
 - 3.1 Control Rod Problem
 - 3.2 Thermal Limits
- 4.0 TECHNICAL ISSUES
 - 4.1 BWR Emergency Core Cooling System Evolution
 - 4.2 Anticipated Transient Without Scram
 - 4.3 Power Oscillation
 - 4.4 Pre-conditioning Interim Operating Management Recommendations
 - 4.5 Loss of All AC Power (Station Blackout)
 - 4.6 Air System Problems
 - 4.7 Interfacing System LOCA
 - 4.8 Service Water System Problems
 - 4.9 Stress Corrosion Cracking
 - 4.10 Shutdown Plant Problems
 - 4.11 Regulatory Oversight Process
 - 4.12 Emergency Action Levels
 - 4.13 Operability
 - 4.14 Reportability
- 5.0 TRANSIENTS
 - 5.1 Introduction to Transients

6.0 BWR DIFFERENCES

- 6.1 Reactor Vessel
- 6.2 Recirculation and Recirculation Flow Control
- 6.3 Reactor Isolation Pressure and Inventory Control
- 6.4 Emergency Core Cooling Systems
- 6.5 Primary Containment
- 6.6 Rod Control Systems
- 6.7 Balance of Plant Systems
- 6.8 Safety Relief Valves

7.0 PLANT EVENTS

- 7.1 Brown's Ferry Fire Log Summary
- 7.2 Oyster Creek Log Summary
- 7.3 Dresden Log Summary
