Subject: Certificate of Compliance Revision Request
SPEC-150 Transport Package, Certificate Number USA/9263/B(U)-96

Dear Sirs:

Source Production and Equipment Co., Inc. (SPEC) is submitting this request for a change to drawing 15B000 to eliminate the QA Classification in the title box. We would also like to request timely renewal at this time, as the certificate is due to expire on June 30, 2010. This will allow us the time needed to obtain the USDOT Certificate of Competent Authority and the Canadian endorsement of our certificate. There have been no changes to the SPEC-150 since it was tested, nor are we requesting any changes to the approved design.

The QA Classification does not belong on drawings referenced in the Certificate of Compliance. It is the category set by SPEC for internal uses using guidance published in NUREG/CR-6407, "Classification of Transportation Packaging and Dry Spent Fuel Storage Systems".

Should NRC require that the QA Classification remain on the drawing, we respectfully request that it be changed to category "QB", per NRC's guidance in NUREG/CR-6407. NUREG/CR-6407 assigns Category B to gamma shielding utilized in "Packaging for Type B (Special Form) Shipments".

As stated in the opening to this letter, there have been no changes to the design of the SPEC-150 Transport Package, nor are we requesting any. Please do not hesitate to contact me if you need any additional information.

Sincerely,

A handwritten signature in black ink that reads "Kelley Richardt". The signature is written in a cursive style.

Kelley Richardt
Regulatory and Quality Manager
