Water Tower Paint and Mixers Installation

We are in the process of having the inside of S. Stoney Creek Water Tower painted and a full restoration of the Pointe Aux Peaux Water Tower. Also both Towers are having Mixing Systems installed. The Mixers will help maintain water quality through out the Tower. So if you see people hanging off the Water Tower in a basket, they are just doing their job.

NO "BOIL WATER" Alert for Frenchtown Water Customers. May 25, 2011.

The City of Monroe has issued a "Boil Water Alert" for all thier water customers. Our Frenchtown Water System is not included in the alert. Frenchtown Water is under no current restrictions. Any Frenchtown Water Customer on the City of Monroe Water has been notified by our staff. If you have any question, please feel free to call our office.

Rate Changes and Water Main Extension Fee

As of January 1, 2011 the current Water Usage Rate of \$1.46 per unit of water used will change to \$1.61 per unit used. Also on January 1, 2011 the Water Main Extension fee is changing to \$14,000.00. A full copy of the Water Rate Schedule and Water Ordinances are located on the left hand side of this page. If you should have any questions or concerns please feel free to call our office.

Post Road Water Main Project Update

The Post Road Water Main Project is completed and the water main is now in service. If you have any question about services in the is area, please feel free to call our office or the Township's Treasure office for details.

Orion Automatic Reading System

We have begun our program on updating our Automatic Meter Reading System. We are currently using a Ramar reading system to read your water meters. Well the Ramar system is coming to it life expectancy, and its time to move forward with a different company. We have decided to move forward with the Orion Reading System from Badger Meter Company. We are very excited with some of the option offered with the Orion reading system. We feel it will help us better server you, our customers. So if you should see one of our crews in your yard, you will know what they are

doing. Most of the time we can change the reader with our having to enter your home. If you should have any concerns with any of my workers on your property, feel free to check up on them. Just call our office to verify who they are.

Spring Restorations

Spring is just around the corner and our yards are starting to turn green again. We are aware that we have a few yard restorations to care of. We normally start our restorations in early May, but we might be out in your yards a little earlier this year. We have had some good weather and hope to get some good topsoil very soon. If you should have any concerns about your yard, please feel free to call the Water Plant.

Water Tower Painting

The Water Tower Painting project went very well. We were very happy with the performance of the painting crew. The project was handle very professional and on schedule.

Water Treatment Plant

The Frenchtown Water Plant is a state of the art 8.0 Million Gallon Per Day (MGD) water treatment plant. The water plant consists of two different types of treatment technologies. The existing 4.0 MGD plant was put into operation in 1994 and is a conventional Claricone system, consisting of 2 Claricones and 4 Rapid Sand Filters. To meet the growing demand of water in the Township a 6.0 MGD Membrane Filter Treatment Plant was built. The plant was completed in 2006 and has some of the newest technology in the water treatment field. The plant has three 2 MGD Membrane filters, and includes a full SCADA system. With the addition of a new Ozone System and the membrane filter technology, we feel we are putting out some of highest quality of water in the state of Michigan.

The water treatment plants main goal is to provide safe, reliable, and aesthetically pleasing drinking water to the Township. We are proud that since the plant was put on line in 1994, we have never been in violation of federal or state drinking water standards.

Water Plant Distribution

The Frenchtown Water Departments Distribution crew handles 43 square mile of township area. We maintain all water meters, water mains and fire hydrants in house. The Distribution crew's main objective is to provide adequate and safe water to the customers. Our crew responds to all of your service questions, water main and service breaks.
