Dear Sir or Madam,

Re: Memorial Hospital of Sheridan County
Sheridan, WY
Docket Number: 030-13772
License Number: 49-10982-02

Memorial Hospital of Sheridan County respectfully requests to have certain and specific Authorized User privileges restored to one of our Physicians that appear to have been mistakenly removed in the form of a clerical error by the NRC during the course of amendment changes over the past several years.

I. On Amendment No. 24 dated June 29, 2004; Dr. Stamato is listed as being an Authorized User for "35.300 and 35.400".

II. On Amendment No. 25 dated April 7, 2006; Dr. Stamato is listed as being an Authorized User for "35.300 oral administration of sodium iodide I-131 and 35.400".

III. On Amendment No. 26 dated April 23, 2007; Dr. Stamato is listed as being an Authorized User for "Oral administration of sodium iodide I-131 and 35.400".

We have reviewed our correspondence with the NRC regarding these amendment requests, and as well the replies from the NRC responding to the same requests and it appears at no time should there have been any changes on our materials license with regard to Dr. Stamato's privileges as there is no mention of them by any either party.

We therefore request that Dr. John P. Stamato be fully restored to his original conditions of "for material identified in 10 CFR.300 and 35.400" as previously allowed by the NRC on Amendment No. 24.

Please do not hesitate to contact me with any questions or if I may be required to provide additional information.

Sincerely,

Thomas R. Nance, RT(R)ARRT

1. Administering I-131 in a route other than prescribed by the materials license:

a. Dr. John Stamato's privileges as an Authorized User clearly state on License 49-10982-02, Amendment No. 26, "Oral Administration of sodium iodide I-131 and 35.400" and the patient in question did receive I-131I.V. I have reviewed several of our License Amendments as well as several letters of communications between MHSC and the NRC that I keep on file with our license and amendment requests. I am confused about some changes in Dr. Stamato's listed "Material and Use" privileges and I am hoping that you can please help me understand how these changes occurred.

- I. **On Amendment No. 24** dated June 29, 2004; Dr. Stamato is listed as being an Authorized User for "35.300 and 35.400".
- II. **On Amendment No. 25** dated April 7, 2006; Dr. Stamato is listed as being an Authorized User for "35.300 oral administration of sodium iodide I-131 and 35.400".
- III. **On Amendment No. 26** dated April 23, 2007; Dr. Stamato is listed as being an Authorized User for "Oral administration of sodium iodide I-131 and 35.400".

Re; Memorial Hospital of Sheridan County USNRC Inspection
August 30, 2011~continued

- b. I have combed through my correspondence including both my letters to the NRC with regards to requests for license changes and the NRC's responses and nowhere do I see any mention of my request for a change in Dr. Stamato's privileges. Nor do I honestly have a single recollection of having any reason to request this change in Dr. Stamato's privileges as an Authorized User. I would sincerely appreciate any guidance you could give me to help me account for the changes in these Amendments as they have occurred chronologically.
- c. I do realize that when you do send a License Amendment that you state in your accompanying letter "you should review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or if you have any questions, contact me at 817-860-8189". I do identify this was my responsibility.
