

## Wind Power Installed in Michigan

The Energy Systems Bureau has identified 144 MW of wind power installed in Michigan as of the end of 2009. The chart below indicates the cumulative MW that have been installed. In 1996 a 600 kW wind generator was installed in Traverse City and in 2001 two 900 kW wind generators were installed near Mackinaw City. In 2007, 32 wind generators (52.8 MW) were installed by John Deere (Harvest Wind Farm) in Huron County. In 2008, John Deere installed 69 MW in Huron County and Heritage Sustainable Energy installed 5 MW in Missaukee County. Heritage installed an additional 14 MW in Missaukee County in 2009.

## Michigan Wind Projects

Traverse City Light & Power – 600 kW, 1996

Mackinaw Wind Turbines – 2 - 900 kW, 2001

Harvest Wind Farm, Huron County – 53 MW, 2007

Michigan Wind I, Huron County – 69 MW, 2008

Stoney Corners, Missaukee County – 2 – 2.5 MW, 2008
