Lansing, MI 48909-8240

SUBJECT: NOTIFICATION OF THE ISSUANCE OF THE DRAFT ENVIRONMENTAL
IMPACT STATEMENT FOR THE ENRICO FERMI UNIT 3 COMBINED
LICENSE APPLICATION REVIEW #ER06-683

Dear Mr. Conway:

The U.S. Nuclear Regulatory Commission (NRC) staff is reviewing an application submitted by Detroit Edison Company (the Applicant) for a combined license (COL) for construction and operation of a new nuclear power plant at its Enrico Fermi Atomic Power Plant (Fermi) site in Monroe County, Michigan. As part of its review of the proposed action, the NRC staff has prepared a draft environmental impact statement (EIS). The U.S. Army Corps of Engineers, Detroit District (USACE), is a cooperating agency on the draft EIS. The draft EIS includes analyses of relevant environmental issues, including potential impacts and effects on historic properties, and documents the NRC staff's determination regarding the suitability of the proposed site for the construction and operation of a new nuclear plant.

Through this letter, the NRC and USACE staff are forwarding the draft EIS to you, in your position of State Historic Preservation Officer, for your review and comment. Pursuant to Title 36 of the Code of Federal Regulations (36 CFR) 800.8(c), we are requesting your comments on the draft EIS and on our preliminary conclusions regarding historic properties. We will address your comments in the final EIS, thus completing consultation under Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA) with the Michigan State Historic Preservation Office, regarding the Fermi Unit 3 COL application.

The NRC staff has conducted an environmental audit at the site and has reviewed information for cultural resources and historic properties within the area of potential effect (APE), as documented in reports prepared for the COL action and previously submitted by the Applicant to your office for review and comment. The NRC staff presented the results of this review, including conclusions regarding the presence of cultural resources and historic properties within the APE and the potential effects of the COL action on historic properties, in a completed Section 106 consultation form for the COL action, which was provided by letter to your office dated December 16, 2010. To summarize this information, archaeological and aboveground surveys were conducted within the direct and/or indirect APEs for the COL action, resulting in the identification of 22 historic properties (all aboveground resources). One historic property, the Enrico Fermi Nuclear Power Plant Unit 1 (Fermi 1) is located within the direct APE; the other 21 historic properties are located within the indirect APE. The NRC staff also contacted 17

federally recognized Indian tribes to request information regarding historic, cultural, and archaeological resources potentially affected by the proposed Fermi 3 project. To date, none of the tribes has responded.

Under the provisions of the NHPA, the NRC staff's preliminary determination is that the proposed COL action will result in an adverse effect on historic properties. Although building the proposed new unit will require the demolition of one historic property, Fermi 1, the impacts and adverse effects of that demolition would be mitigated according to stipulations proposed in the Draft Memorandum of Agreement (MOA). The MOA has been revised in accordance with comments provided by Mr. Brian Grennell of your office on September 29 and October 6, 2011. We also discussed with Mr. Grennell and Ms. MacFarlane Faes of your office, that we will be contacting seven potentially interested parties to solicit their views on resolving adverse effects of the undertaking.

The NRC and USACE plan to hold two public meetings to go over the analysis and results in the draft EIS on Thursday, December 15, 2011, at Monroe County Community College, La-Z Boy Center Meyer Theater, 1555 South Raisinville Road, Monroe, Michigan 48161. The first meeting will convene at 1:00 p.m. and will continue until 4:00 p.m., as necessary. The second meeting will convene at 7:00 p.m., with a repeat of the overview portions of the first meeting, and will continue until 10:00 p.m., as necessary. The meetings will be transcribed and will include: (1) a presentation of the contents of the draft EIS; and (2) the opportunity for interested government agencies, organizations, and individuals to provide comments on the draft report. Additionally, the NRC and USACE staff will host informal discussions one hour before the start of each meeting during which members of the public may meet and talk with NRC and USACE staff members on an informal basis. You and your staff are invited to attend. In the event that the La-Z-Boy Center is closed due to weather conditions on December 15, 2011, the open houses and public meetings would be held on Monday, December 19, 2011, during the same hours as listed above.

Please provide any information, comments, or concerns you feel are appropriate on the draft EIS during the comment period, which ends on January 11, 2012. Comments can be submitted by several means: (1) by mail to the Chief, Rulemaking, Directives, and Editing Branch, Division of Administrative Services, Office of Administration, Mailstop TWB-05-B01M, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001; (2) by e-mail to Fermi3.COLEIS@nrc.gov; or (3) in person during the public meetings. In addition, the draft EIS can be found online at <http://www.nrc.gov/reactors/new-reactors/col/fermi.html>.

B. Conway
