NRC: Zhian Li, Jennie Rankin			
DOE: Jim Wade, Don Darrington, Craig Tyler, Mike Cook			
The NRC staff is currently reviewing an amendment request to the Model No. ATR FFSC transport package. The request			
adds a small quantity payload to the content description. The staff needed a clarification to the packaging of the payload as it			
relates to the criticality analysis. DOE clarified that the contents were to be wrapped in neoprene and/or polyethylene. The			
staff noted that from the preliminary review of the amendment, additional information regarding how neoprene affects			
reactivity may be needed.			
The applicant stated that this information may be readily available and could prepare the information if the staff requests it			
during the Request for Additional Information process.
