

Docket No. 50-334

OCT 25 1985

Duquesne Light Company  
ATTN: Mr. J. J. Carey  
Vice President  
Nuclear Group  
Post Office Box 4  
Shippingport, Pennsylvania 15077

Gentlemen:

Subject: Fire Protection Safe Shutdown Inspection - Beaver Valley Power Station  
Unit 1

Gentlemen:

This letter is to inform you of our plans to conduct an NRC special announced team inspection on November 18-22, 1985, of your facility with regard to the ability to provide safe shutdown in the event of a fire.

To effectively conduct the inspection, we request that analyses, procedures and other documentation on this subject, be available at the site during the inspection. If possible, engineering personnel knowledgeable of your efforts in this area should also be available. In addition, we are requesting that one set of such documentation be made available to the team at the Region I office of the NRC in King of Prussia, Pennsylvania, before November 1, 1985. We previously discussed this information request with your staff and we have made arrangements to have this information delivered to the NRC.

Your staff has indicated that a work location for the team in an area with easy access to the plant drawing files has been arranged. Additionally, we understand that personnel escorts will be available to allow team members ready access to all areas of the plant. We request that you specify a member of your staff as a primary point of contact for the team to meet with at the end of each day to discuss any findings the team may have and to receive requests for additional information required to resolve any open issues.

Your cooperation with us during this inspection is greatly appreciated. Should you have any questions, please do not hesitate to contact me at (215) 337-5283.

Original Signed By:  
Jacque P. Duff

  
Stewart D. Ebnetter, Director  
Division of Reactor Safety
