**BELL BEND NUCLEAR POWER PLANT  
SCHEDULE INFORMATION FOR RAI No.101,  
FSAR CHAPTER 11  
BNP-2011-176                      Docket No. 52-039**

Reference: 1) R. R. Sgarro, (PPL Bell Bend, LLC) to U.S. Nuclear Regulatory Commission (NRC), "Schedule Information for RAI No. 101, FSAR Chapter 11," BNP-2011-147, dated July 22, 2011 (ML11213A092)

The purpose of this letter is to provide updated schedule information for the response to Request for Additional Information (RAI) No. 101 identified in Reference 1. This RAI addresses the Liquid Waste Management System, as discussed in Section 11.2, and the Gaseous Waste Management System as discussed in Section 11.3 of the Final Safety Analysis Report (FSAR) and submitted in Part 2 of Bell Bend Nuclear Power Plant (BBNPP) Combined License Application (COLA).

In Reference 1, PPL Bell Bend, LLC (PPL) indicated that PPL would provide a schedule for the completion of the response to RAI 101 on or before September 26, 2011. While work is being completed on the generic aspects of the safety review for the U.S. EPR Design Certification and Reference COLA, PPL is focused on revising the Environmental Report as provided in Part 3 of the BBNPP COLA. Accordingly, we are concurrently rebaselining the schedule for the remaining work in the FSAR, including Section 11. PPL will provide a schedule for submitting the responses to RAI 101 by November 16, 2011.

The only new regulatory commitment is to provide a schedule for submitting the response to RAI 101, by November 16, 2011.

If you have any questions, please contact the undersigned at 570.802.8102.

Respectfully,

  
Rocco R. Sgarro
