Name of Participant(s): Gary Tellish, RSO
Scott Wilson, RI Health Physicist

Telephone No. (724) 443-1533.

Subject: Request for Information; RE: License Amendment Application Received 9/20/2011

Mr. Tellish was called to ask for additional information regarding the license amendment letter received September 20, 2011, by RI. The letter requests an increase in the maximum possession limit (MPL) for Cs137 from 18 mCi to 200 mCi; however, the license authorizes Troxler Model 3400 series gauges which contain Cs137 & Am241. The letter did not request an increase in the MPL for Am241. The letter also requests authorization for one Thermo Scientific SGDO density gauge Model 5190. No information was provided regarding the sealed source model for the item requested.

I asked Mr. Tellish to resubmit the amendment request using NUREG 1556, Volume 4 as a reference. I reviewed the NUREG with Mr. Tellish and provided guidance on Form 313 and the checklist in Appendix D. I informed him that he must include the device model number, number of devices, source model numbers, and information regarding the fixed density gauge. I also requested that the Form 313 be signed by a principal of the company and include the point of contacts' telephone number.

Mr. Tellish said he would complete the checklist in Appendix D of the NUREG and a new Form 313 and resubmit the application. I informed him that I would be out of the office next week; however, if he needed assistance he could call and ask any member of the Branch.

Action Required: Brayman Construction Corporation to submit a complete application for amendment. This record to be saved in ADAMS under the MC & docket numbers above.
