FIRST TRAINING FOR CHINA ON AP 1000 TO BEGIN ON AUGUST 6, 2007

Comment:

On August 3, 2007, five staffers of an eight member NRC delegation will travel to Beijing, China to begin a two-week training seminar on the AP 1000. The other three members of the delegation will depart on August 10-11, to support the second phase of the program. The training will take place in Beijing (Aug. 6-10) and in Beidaihe, China (Aug. 11-19).

The NRC agreed to provide the Chinese National Nuclear Safety Administration (NNSA) with training on the design and construction of the AP 1000 in the Memorandum for Cooperation which was signed by both agencies in May 2007. This training is the first part of the technical training program the NNSA has requested. The NNSA will reimburse the NRC for the travel and per diem costs of each traveler.

The delegation will be comprised of: Scott Moore, Deputy Director of International Programs; John Ramsey, International Programs; Joelle Starefos, Office of New Reactors (NRO) and team lead for technical trainers; Ashok Thadani, NRO; Patrick Madden, NRO; Jerry Wilson, NRO; Stephen Bajorek, Office of Nuclear Research; and Richard Scott Egli, Office of Human Resources/ Technical Training Center- Chattanooga. The training agenda is attached.
