This letter is in follow up to our phone conversation today. Attached is a completed NRC Form 314. As I stated the specific materials license was in our possession due to a Kevex XRF Analyzer. This unit was traded in to Niton in January, 2004. An Acknowledgment letter of their receipt of this unit is attached. I was unable to find the most recent wipe test on this unit but I have also attached the latest I could find.

In a conversation I had with Steven Quartermash from your organization, he indicated that your data base indicated we have four Niton devices. I've also attached the documentation of when the last two were returned to Niton.

If there is any more information you need or have any questions please do not hesitate to contact me.

Sincerely,

Scott Jacobs

Estimated burden per response to comply with this mandatory collection request: 30 minutes. This submittal is used by NRC as part of the basis for its determination that the facility is released for unrestricted use. Send comments regarding burden estimate to the Information Services Branch (T-5 F53), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by internet e-mail to infocollects.Resource@nrc.gov, and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0028), Office of Management and Budget, Washington, DC 20503. If a means used to impose an information collection does not display a currently valid OMB control number, the NRC may not conduct or sponsor, and a person is not required to respond to, the information collection.
