SEP 15 2011

Mark Haenchen, M.S., J.D.  
Saint Louis University  
Radiation Safety Officer  
1402 South Grand Blvd.  
St. Louis, MO 63104

SUBJECT: APPROVAL FOR UNRESTRICTED USE OF ST. LOUIS UNIVERSITY'S PEDIATRIC RESEARCH INSTITUTE BUILDING

Dear Mr. Haenchen:

In letter dated August 18, 2011, you contacted the U.S. Nuclear Regulatory Commission (NRC) and requested that the Pediatric Research Institute Building be approved for unrestricted use pursuant to 10 CFR 20.1402 "Radiological Criteria for Unrestricted Use." The NRC staff has reviewed your final status surveys. Based on its review, the staff has concluded that all licensable radioactive material has been removed from the facility and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.

Based on these conclusions no further remediation or actions with respect to NRC regulated material is required. Your Pediatric Research Institute Building is suitable for unrestricted use and NRC license number 24-00196-07 has been modified to incorporate your final status survey report. This information must be retained with your decommissioning records pursuant to 10 CFR Part 30.35 "Financial Assurance and Recordkeeping for Decommissioning."

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(20)(iii).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 Code of Federal Regulations 2.390, the enclosed license document is exempt from
