I am under the belief that the natural disaster in Japan is enough for Pennsylvania to make a move toward clean energy. It is a matter of thinking ahead to the future generations and protecting quality of life for those who follow.

Renewing Limerick's license just as controversies are arising with pushes to move from dependence on Nuclear energy is a bold business strategy by them. I don't think this is the right move to make. A long term contract will limit any sort of wiggle room to address future issues that may arise.

I ask that you please consider the future of our great state. I don't think oil or nuclear energy is the way. I truly believe in heart, that in order to protect the health of our population for the future, we must change our ways today.

Sincerely,

Steven Furber
