Nuclear Regulatory Commission

To Whom It May Concern:

44 RWT 03038428

We are requesting an amendment to our NRC License Number ~~22-31434-01~~ to include the following Hydrogen 3 sealed source for use in a Thermo Model 211 neutron generator:

Manufacturer: Physics Corporation (Colorado)

Model #: P211

Part #: 151169-001-F

Serial #: 10157-2-238

Original Activity: 4.7Ci

Date of Manufacture 27 May 2005

We will be using this source in lieu of the two Sodern sources identified in our license due to current lack of availability of the Sodern sources.

We are requesting expedited review of this amendment because the source has been mistakenly shipped to us and we are awaiting approval to begin work.

Thank you for your assistance. If you have any questions or require further information, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "John W. Haas, III".

John W. Haas, III
