

November 7, 2011

Mr. John Elnitsky  
Vice President, Nuclear Plant Development  
Progress Energy Florida, Inc.  
P.O. Box 14042  
Saint Petersburg, FL 33733

SUBJECT: STATUS OF THE ENVIRONMENTAL REVIEW FOR LEVY NUCLEAR PLANT  
UNITS 1 AND 2 COMBINED LICENSE APPLICATION

Dear Mr. Elnitsky:

The purpose of this letter is to inform Progress Energy Florida, Inc. (PEF) of the current status of the environmental review for the combined license (COL) application for the Levy Nuclear Power Plant Units 1 and 2. This letter discusses outstanding information items that are needed by the U.S. Army Corps of Engineers (Corps or USACE), and thus the U.S. Nuclear Regulatory Commission (NRC) staff, to complete our review. These issues must be promptly resolved in order for the NRC and Corps staff to complete preparation of and issuance of the final environmental impact statement (FEIS).

The NRC staff, in cooperation with the Corps, is working to complete the FEIS in accordance with the published schedule as identified by letter dated November 30, 2010 (ML103150010). PEF has committed to meeting the Corps' requests for additional information (RAI) by November 18, 2011, per letters dated June 23, 2011 (ML111751510) and September 9, 2011 (ML112790415), and significant progress has been made in preparing the FEIS. Receipt of all the requested information is necessary to meet the environmental review schedule. Additionally, it will be necessary for PEF and the Corps to resolve outstanding issues regarding the Corps' evaluation and determination of the Levy Nuclear Plant Units 1 and 2 (LNP) site as the Least Environmentally Damaging Practicable Alternative (LEDPA), the timing of which could also jeopardize the current FEIS schedule.

The NRC, as the lead Federal agency for the environmental review, is working closely with the Corps to ensure that both agencies can make timely and informed decisions for their respective Federal actions. If requested, the NRC staff will schedule meetings with PEF, the Corps, and other Federal and State agencies to review and discuss outstanding items and determine the steps necessary to resolve these issues. All issues associated with Corps RAIs must be adequately resolved and outstanding information be submitted to the NRC and Corps staff no later than November 18, 2011, in order to avoid jeopardizing the current projected schedule for publication of the FEIS. If information submitted by PEF does not adequately address the outstanding Corps issues, the new information is comprised of greater than anticipated complexity, or other issues develop from the NRC and the Corps' further review and coordination, then the projected FEIS schedule for publication could be extended.

The NRC and Corps staff request that PEF inform both agencies as soon as possible of any other issues or changes in the project that could potentially affect the environmental review, so that those changes can also be taken into account to evaluate any possible impact to the current environmental review schedule. In the meantime, the NRC and Corps staff will continue to complete the FEIS with information recently received from PEF to facilitate timely issuance of the FEIS.

For actions involving USACE, the NRC will coordinate with Mr. Gordan Hambrick, USACE Jacksonville District's Regulatory Office. Mr. Hambrick can be contacted by phone at 850-763-0717, and via e-mail to [Gordon.A.Hambrick@usace.army.mil](mailto:Gordon.A.Hambrick@usace.army.mil).

The NRC and Corps look forward to working with PEF to address the remaining issues. If you have any questions or comments regarding this matter please contact Mr. Douglas Bruner, the NRC environmental project manager, at 301-415-2730, or via e-mail to [Douglas.Bruner@nrc.gov](mailto:Douglas.Bruner@nrc.gov).

Sincerely,

*/RA/*

Scott Flanders, Director  
Division of Site and Environmental Reviews  
Office of New Reactors  
U.S. Nuclear Regulatory Commission
