October 4, 2011

John Murray
Tribal Historic Preservation Officer
Blackfeet Tribal Business Council
PO Box 850
Browning, MT 59417

Dear Mr. Murray:

As you may be aware, Strata Energy is currently conducting permitting activities for installation of an in-situ uranium recovery facility near Oshoto, Wyoming (the "Ross ISR Project"), approximately 11 miles west of Devil's Tower National Monument. On September 13-14, 2011, the US Nuclear Regulatory Commission (NRC) conducted a Section 106 Tribal Consultation to allow interested tribes to tour the Ross Project.

As we are not currently aware of a response from the Blackfeet Tribe requesting or declining Section 106 consultation on this project, we would like to make every effort to keep you informed. To facilitate that process, I am including in this letter the following items that were provided to tribes attending the September tour:

1. Project fact sheet
2. Maps of the project area
3. Redacted cultural report
4. Strata Energy Section 106 tour reimbursement policy

Following the September 13 tour, attending tribal members asked that we provide some additional information to help them better understand the scope of the Ross Project. Those items have been provided, and I am enclosing a copy for your information, as well:

1. A CD containing the following:
 - a. 3-D fly-through simulation of project area geology and proposed Central Processing Plant;
 - b. The Environmental section of Strata's application to the NRC for a Combined Source and 11e.(2) Byproduct Material License. This document contains the redacted cultural report, a hard copy of which was provided to tribal members at the September 13 tour;
 - c. Viewshed study showing the view of the project area from Devil's Tower National Monument, and
2. A copy of the sign-in sheet from the September 13 tour.

3. A listing of all tribes to which correspondence was sent by the NRC advising of the Section 106 process and related tour.

While we understand that Section 106 consultation is a government-to-government process between the tribes and the NRC, we at Strata Energy wish to support that process wherever possible. To that end, if you have any questions regarding the enclosed materials, please do not hesitate to contact our public outreach coordinator, Melissa Butcher, at (307) 751-3789. Questions about the Section 106 process should be directed to the NRC. If you wish to decline Section 106 consultation on this project, please contact Melissa or the NRC.

We look forward to facilitating a successful Section 106 process and hope to have the opportunity to visit with you in the future. It is our understanding that the NRC plans to host another consultation at the Ross site on October 26-27, 2011, and we welcome you to join us on those dates as your schedule permits, or to schedule a separate visit at your convenience. We will be happy to cover your expenses for your visit per our reimbursement policy.

Please don't hesitate to call or stop in if you are in the Gillette area, or to contact Melissa if you wish to tour the project again at a later date.

Respectfully,

A handwritten signature in black ink, appearing to read "Mike Butcher", with a long horizontal flourish extending to the right.

Mike Butcher
