DNMS

September 26, 2011

Please amend our broad scope byproduct material license 05-01399-08 (Docket 030-03728) as follows:

We request to add an Amersham Model CLN PG1 sealed source with serial number CLNK3863. The Cm-C neutron source contains 160 mCi of Cm-244. Our license does not currently allow us to possess 160 mCi of Cm-244 in a single source. Please amend our license Sections 6, 7, and 8 to have a new line item M that includes this source. Also please add this new line item (M) to Section 9 "Authorized Use" as being used in research and development as defined in 10 CFR 30.4. This source will be used at the authorized Denver Federal Center location.

USGS License 05-01399-08 (docket 030-03728)
Radiation Safety Chairman: James Paces
Radiation Safety Officer: Craig Hendrickson
Denver Federal Center, Building 53
