Subject: GIS shape files for Levy

Hello Doug,

I hope the fall is nice up there for you. Here it's still quite hot.

I apologize in advance for my ineptitude in locating the disclosures I ask you for. I seem unable to get the hang of finding things and right now I am wondering if you can easily point me to the actual GIS shape files for the proposed Levy nuke plant showing the location and extent of the proposed:

1. Units 1 and 2
2. associated stormwater facilities/excavations
3. associated wells (proposed and/or existing)
4. associated roads
5. any other structures or land alterations related to the proposed plant

If you would be so kind as to point me to where those files are located or whence I could get them, I would be extremely grateful. In case they are not located on line, and that you have them, I hope the shape files are small enough to email to me as a compressed zip file and that it would not be too much trouble for you to do that. If there is someone else at the NRC whom I should contact for the information, please let me know.

Thank you very much for your help, as always.

Cara

“Our nuclear plants are like snowflakes, they’re all different and they can all melt.”
