October 10, 2011

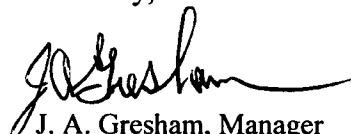

**U. S. Nuclear Regulatory Commission  
10 CFR 50.46 Annual Notification and Reporting for 2008, 2009, and 2010**

Westinghouse Electric Company (Westinghouse) provides notification and reporting letters at least annually to our licensees in order to report the impact of changes or errors in the emergency core cooling system (ECCS) evaluation models used by Westinghouse. These letters allow our licensees to comply with the reporting requirements of 10 CFR 50.46. Westinghouse also generally transmits a courtesy copy of the annual report to the U.S. Nuclear Regulatory Commission (NRC) to make the NRC aware of any changes from the previous year.

It has recently come to our attention that the 10 CFR 50.46 annual notification and reporting letters for 2008, 2009, and 2010 were not transmitted. As such, these reports have been enclosed so that the NRC has a complete set of Westinghouse 10 CFR 50.46 annual notification and reporting letters. Although the letters were not previously transmitted to the NRC for 2008, 2009, and 2010, Westinghouse did notify licensees as previously described.

Please do not hesitate to contact me if you have any questions regarding the content of this letter or the enclosures.

Sincerely,

  
J. A. Gresham, Manager  
Regulatory Compliance
