Mr. E G Case, Acting Director
Directorate of Licensing
Office of Regulation
United States Atomic Energy Commission
Washington, D.C. 20545

REGULATORY DOCKET FILE COPY

Dear Mr. Case:

Monticello Nuclear Generating Plant
Docket No. 50-263 License No. DPR-22

Third Reload Submittal

Attached is a report entitled "Monticello Nuclear Generating Plant Third Reload Submittal." This submittal supplements the topical report, "GE/BWR Generic Reload Licensing Application for 8x8 Fuel," November, 1974 (NEDO-20360 Revision 1). These two documents provide the safety evaluation of the proposed Monticello Cycle 4 core.

We have concluded that the proposed Cycle 4 operation does not involve a significant hazards consideration and that no Technical Specification changes are required. The Monticello Operations Committee and Safety Audit Committee have reviewed the Third Reload Submittal.

Our outage is scheduled to commence on January 9, 1975 and is expected to conclude within approximately one month of that date. We shall appreciate establishment of a review schedule by the Commission consistent with these plans.

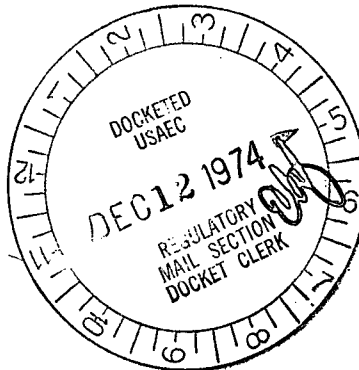

Yours very truly,

A handwritten signature in cursive script that reads "L. O. Mayer".

L O Mayer, PE
Director of Nuclear Support Services
