**NSP****NORTHERN STATES POWER COMPANY**

MINNEAPOLIS, MINNESOTA 55401

May 22, 1974

Mr. A Giambusso  
Deputy Director for  
Reactor Projects  
Office of Regulation  
Directorate of Licensing  
U S Atomic Energy Commission  
Washington, DC 20545

Dear Mr. Giambusso:

MONTICELLO NUCLEAR GENERATING PLANT  
Docket No. 50-263 License No. DPR-22

## Anticipated Transients Without Scram (ATWS)

Our letter of December 27, 1973 on this subject said that we are currently working with General Electric on performance of the necessary ATWS analyses and intend to submit a report on ATWS by October 1, 1974.

We have been advised by General Electric that their resources to support the many customer licensing analyses required in the near future are limited. They find that they can complete the Common Mode Failure analysis for submittal by October 1, 1974; however, an additional six-month period of time will be necessary to complete the ATWS consequence analysis.

It is our intent to submit the Common Mode Failure analysis by October 1, 1974, and at that time to advise you if any improvement can be expected in the scheduled March 1, 1975 date for submittal of the ATWS consequence analysis.

Yours very truly,

L O Mayer, PE  
Director of Nuclear Support Services
