NORTHERN STATES POWER COMPANY

September 7, 1973

Docket No. 50-263

Mr A Giambusso
Deputy Director
Directorate of Licensing
U S Atomic Energy Commission
Washington, DC 20545

Dear Mr Giambusso:

MONTICELLO NUCLEAR GENERATING PLANT E-5979
Postulated Pipe Failures Outside Containment

In response to your request letter of December 18, 1972 and referenced in our letters of January 5, May 23, and July 25, 1973, we are submitting under separate cover 60 copies of a report resulting from a study conducted on the subject matter. The study was guided by the requirements furnished with your December 18 letter as modified by the errata conveyed with your January 16, 1973 letter.

As indicated in Section 7 of the report, the study finds that the only plant modification required is the addition of structural facilities above the feedwater lines to protect the mezzanine floor against the pressure of jet impingement. The required design work has begun and we anticipate material can be delivered to allow completing the work during the first quarter of 1974.

Yours very truly,

E C Ward, Director

Engineering Vice Presidential Staff
