September 17, 1976

50-263

Mr. Paul F. Collins, Chief
Operator Licensing Branch
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Collins;

It is the purpose of this letter to document information given to you by Mr. J. R. Pasch during a phone conversation of September 16, 1976. As was stated, an annual requalification exam for licensed operators was not administered in 1975. The previous examination had been administered in September of 1974 and it was the intent to conduct the latter examination in September of 1975; however a refueling outage from September to November of 1975 precluded administering the examination. The actual examination was given in January and February of 1976. Because of the aforementioned scheduling problems no examination was given during calendar year 1975.

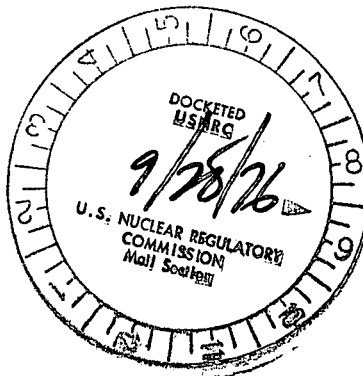

The next examination is scheduled for January and February of 1977. It is felt that administering the examination during the first of the year will eliminate future scheduling conflicts.

Yours very truly,

L. R. Eliason
Plant Manager
