Sam..... John Klos is correct, in that the rows should be moist air (external). It appears that the environment was incorrectly stated in the letter as moist air (internal)... you'll notice that the environment was not identified as a change in the letter, so it appears to be a copy/paste error.

We will correct these two environments in our next letter. No conference call necessary.

---

Steve,

Can we discuss the concern below this week?

Thanks

**Subject:** RE: FENOC Letter L-11-252 Davis-Besse License Renewal RAI Responses

Sam,

I need a follow up conference call with the applicant.

Concerning the applicant's recent Supplemental RAI response for 3.2.2.2.3.6-2, Davis Besse indicates that

Table 3.3.2-26, row no.83, pump casing-service water pump (DB-P3-1, 2 & 3), steel, loss

of material and  
Table 3.3.2-27, row no. 38, piping, stainless steel, loss of material are  
now in a environment of moist air(internal).

The original LRA and our current listing of these line items presents that they are  
exposed to an environment of moist air (external).

Questions to the applicant:

Please confirm that these line items are subject to a moist air (external) environment  
and submit a correction letter stating that, as appropriate.  
Once the environment has been confirmed for these line items, please restate the AMP to  
be assigned to these line items related to  
the applicant's response for 3.2.2.2.3.6-2.

Regards,

John Klos

All:

In my previous e-mail some of the info in the 1st paragraph was incorrect. It should be  
correct now, see below.

All:

Attached is Davis Besse RAI response. The below table lists the RAI/teleconference  
responses that you'll find in the attached letter.

Please review the letter and let me know if you'll need additional clarification and I'll  
schedule a Teleconference with the applicant asap. If follow-up RAIs are needed please  
let me know as well.

Note: All the SER input I've received so far has been incorporated. So please for those  
of you who already sent me the SER input but now need to revise it, especially those who  
can now close their open items, please use the track changes tool (or highlight) if  
possible so I don't have to go through all your input to determine what has been  
modified. Thanks-Sam C. de Jesús
