Cliff:

Can you clarify the statement in the email below? This is related to DBs response to RAI 3.1.2.2-3 received 9/16/2011.

Regards,

Subject: Closing of the DB CASS Loss of Fracture Toughness Item

Hi, Sam,

Elizabeth and I are finalizing the SER input for DB CASS Loss of Fracture Toughness Item. We are expecting to provide SER input approximately in a week.

Just one item is that as I emailed you last week, we need to confirm that the applicant's terminology "plenum cylinder reinforcement casting" refers to the same component with "plenum cylinder reinforcing plate." As I mentioned, I think email confirmation is sufficient based on the context of the RAIs and the responses to them.

As you know, "plenum cylinder reinforcing plate" has been used in the previous responses to discuss the topic.

Thanks,
Seung Min
