We are today sending to you under separate cover, one copy of Northern States Power Company's Monticello Nuclear Generating Plant 1969 Environmental Monitoring Program Annual Report.

This is the second annual report and includes the results of background radiation monitoring and the ecological studies in the area of the plant.

The binding device will be sent later, as we feel distribution of the report as early as possible is desirable.

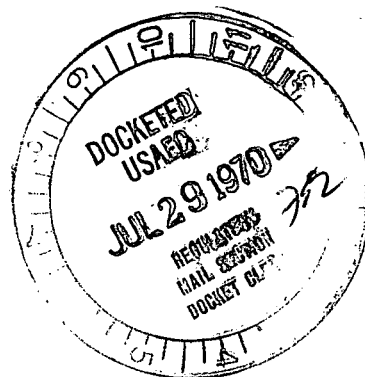

If you have any comments, or require additional copies, please feel free to contact us.
