File Cy.

Dear Mr Giambusso:

MONTICELLO NUCLEAR GENERATING PLANT E-5979
Postulated Pipe Failures Outside Containment

The following information is in confirmation of telephone conversations with your Mr J J Shea on July 13 and July 24.

It is necessary that we reschedule the submission date for our detailed analysis report of the consequences of postulated pipe failures outside of the containment structure.

We are now reviewing the first draft of this analysis study prepared by our Architect-Engineer and following this complete review, about two weeks will be required for redrafting the report. The redrafted report will then be given a final review and prepared for submission in accordance with your copy requirements. Accordingly we plan to submit our response during the week of September 3, 1973.

Until the final report is submitted we refer you to the preliminary reporting contained in our letter of January 5, 1973 and the information conveyed in our meeting with your staff on February 5, 1973.

Yours very truly,

E C Ward, Director

Engineering Vice Presidential Staff
