Dear Dr Morris:

MONTICELLO NUCLEAR GENERATING PLANT E-5979
Amendment Change Request No. 2

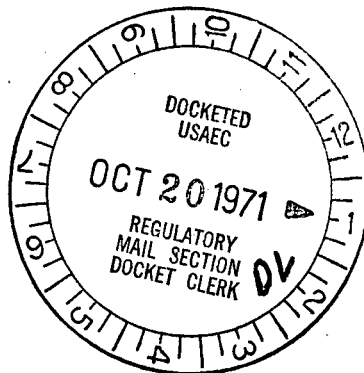

Attached are three signed originals and nineteen conformed copies of Amended Change Request No. 2, to the Monticello Nuclear Generating Plant Operating License No. DPR-22.

Under separate cover, we are sending you 40 copies of the following technical information:

- (1) Answers to questions conveyed with Dr Morris' letter of June 3, 1971.
- (2) Updated issue (October 1, 1971) of Gaseous Radwaste System Modification Report originally submitted with Change Request No. 2.
- (3) Report MOG-DR-2 (Rev C) covering Operating Concepts for the modified off-gas system.

The technical information described above was furnished to the plant Operations Committee and to the Safety Audit Committee for review and recommendations. The Operations Committee has reviewed and found satisfactory the above described technical information. Formal action on the matter by the Safety Audit Committee will be taken at its October 27-28 meeting. We will advise you of the action taken by the Safety Audit Committee.

Section 50.59 (a) of AEC regulations requires prior commission approval of changes in the Technical Specifications or of changes involving unreviewed safety questions. We applied for commission authorization pursuant to Section 50.59 (d) because of the resultant changes necessary to the Technical Specifications. The proposed changes to the radwaste system may constitute an unreviewed safety question, as that term is defined in Section 50.59 (c). However, we believe the safety analysis included in our Modification Report

4588

- 2 -

supports our conclusion that the proposed changes do not present significant hazards considerations not described or implicit in the Final Safety Analysis Report.

Yours very truly,

A handwritten signature in cursive script, appearing to read "E C Ward".

Received w/Ltr Dated 10-15-71

Amended Change Request No. 2

UNITED STATES ATOMIC ENERGY COMMISSION

NORTHERN STATES POWER COMPANY

Monticello Nuclear Generating Plant

Docket No. 50-263

REQUEST FOR AUTHORIZATION OF
MODIFICATIONS TO GASEOUS RADWASTE SYSTEM
PROVISIONAL OPERATING LICENSE NO. DPR-22

Northern States Power Company, a Minnesota corporation, proposed certain modifications to the gaseous radwaste system by submission of Change Request No. 2 dated April 1, 1971. This request is hereby amended by submission of the following technical information:

- (1) Answers to questions conveyed with Dr Morris' letter of June 3, 1971.
- (2) Updated issue (October 1, 1971) of Gaseous Radwaste System Modification Report originally submitted with Change Request No. 2.
- (3) Report MOG-DR-2 (Rev C) covering Operating Concepts for the modified off-gas system.

This amended request contains no restricted or other defense information.
