MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

Addendum No. 1 to
License Amendment Request Dated October 10, 1980
Scram Discharge Volume

Attached are 3 originals and 37 conformed copies of a request for a change in the Technical Specifications, Appendix A, of Operating License DPR-22. No amendment fee is included since it was enclosed with the October 10, 1980 License Amendment Request on the same subject. (Also see NSP letter dated May 20, 1982 titled: Schedule for Modification of the BWR Scram System).

The proposed Technical Specification changes would change Limiting Conditions for Operation and Surveillance Requirements for the scram discharge volumes as modified.

Exhibit A contains the proposed changes, reasons for change, and safety evaluations. Exhibit B contains revised Appendix A pages showing the proposed changes.

Timing of the approval of this amendment will need to be coordinated with the timing of the installation of the new system. We plan to propose to you an issuance date late in August of this year.
