MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

Revision 2 to License Amendment Request Dated April 29, 1985
Combustible Gas Control System

Attached are three originals and 37 conformed copies of a request for a change of Technical Specifications, Appendix A, of Operating License DPR-22.

This submittal is a revision of our License Amendment Request dated April 29, 1985 which was submitted following installation of a combustible gas control system to meet the requirements of 10 CFR Part 50, Section 50.44. However, certain portions of our April 29, 1985 submittal were found to be unacceptable by the NRC staff. A meeting was held in Bethesda, Maryland on July 24, 1985 to resolve these issues and this revised submittal includes the resolutions reached at that meeting.

Exhibit A contains the proposed changes, reasons for change, and significant hazards evaluation. Exhibit B contains revised Technical Specification pages showing the proposed changes.

This revision replaces in its entirety our April 29, 1985 License Amendment Request and Revision No. 1 which was submitted on June 14, 1985. No additional licensing review fee is necessary since a fee accompanied our April 29, 1985 application.
