MONTICELLO NUCLEAR GENERATING PLANT  
Docket No. 50-263 License No. DPR-22

Revision No. 2 to  
License Amendment Request Dated September 24, 1982

Attached are three originals and 37 conformed copies of a revision to our License Amendment Request dated September 24, 1982. A license amendment fee for this revision was determined to be unnecessary because it is within the scope of the License Amendment class determination and fee that was included with the original submittal.

This submittal proposes additional changes to the wording for jet pump operability and surveillance requirements. These changes are the result of NRC Staff review of our September 24, 1982 and September 29, 1983 submittals. These changes have been discussed with the Monticello Project Manager in the Division of Licensing.

This submittal consists of revised wording for Exhibit A, Item (6), and revised pages 128 and 153 for Exhibit B.

Please contact us if you have any questions related to this revised License Amendment Request.
