SUMMARY

We have conducted a preliminary review your license amendment request dated June 30, 2011, and find that we are unable to continue this action until we have received information regarding the following:

- Under 10 CFR 35.24, a licensee's management shall appoint a Radiation Safety Officer in writing. Please provide a current, signed RSO Memorandum of Understanding/Delegation of Authority, which conforms to the requirements specified in 10 CFR 35.24(b) and 10 CFR 35.24(e). No such written statement was included with the renewal application.
RESPONSE: Licensee contact indicated that such a document would be submitted on or before September 29, 2011. The current MOU/DA was received via facsimile on September 28, 2011. No additional response is required.
- The request includes a completed NRC Form 313A (RSO) for James I. Monroe, Ph.D. The preceptor attestation indicates that Dr. Monroe's Training & Experience arise from both a Board Certification and his AMP status. However, the Board Certification does not apply in this case. Please resubmit all or a portion of the NRC Form 313A (RSO) indicating that the proposed RSO qualifies as such under either 10 CFR 35.50(a) or 35.50(c).
RESPONSE: The licensee resubmitted page 4 of the form via facsimile on September 28, 2011, as the supporting Board Certification was not included in the package. Combined with the applicant's status as an AMP on the licensee's license, the response is sufficient. No additional response is required.

Please submit :

- MOU/DOA documentation and RSO qualification clarification, as indicated above.

to my attention via either facsimile (630-515-1078), phone (630-829-9892), or as a pdf file attached to an email addressed to sara.forster@nrc.gov. Reference Control No. 575634, listed at the top of this memo, with any additional correspondence, relating to this action. Direct questions to me at (630) 829-9892.

NOTE: Responses received via facsimile dated September 28, 2011, are adequate to fulfill the request. No further action is required.
