Docket No. 50-263 License No. DPR-22

Revision No. 1 to License Amendment Request Dated October 3, 1986

Attached is a revised Exhibit B page for our License Amendment Request dated October 3, 1986. The attached Exhibit B page 199 should be substituted for page 199 of the original submittal.

This revised page incorporates an improvement in the wording originally submitted for the proposed Limiting Conditions for Operation applicable when the new No. 2R transformer is available for use.

The evaluations contained in Exhibit A of our original submittal and the remaining portions of Exhibit B are unaffected by this change.

A license amendment fee for this submittal was determined to be unnecessary because it is a revision to a License Amendment Request for which a fee has already been paid. Please contact us if you have any questions related to this revision or if additional information is required to supplement it.
