MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

License Amendment Request Dated July 26, 1989
Deletion of Cycle Specific Parameters (Generic Letter 88-16)

Attached is a request for a change to the Technical Specifications, Appendix A of the Operating License for the Monticello Nuclear Generating Plant. This request is submitted in accordance with the provisions of 10 CFR Part 50, Section 50.90.

This license amendment was prepared following the guidance provided in Generic Letter 88-16. This change proposes the removal of cycle-specific limits from the Technical Specifications and creation of a new Core Operating Limits Report. The limits removed from the Technical Specifications will be placed in the Core Operating Limits Report.

Startup of Cycle 14 is contingent upon NRC approval of this license amendment. Cycle 14 is scheduled to startup on November 5, 1989. If approval of this change is not possible on this time schedule, please notify me as soon as possible.

Exhibit A contains a description of the proposed changes, the reasons for requesting the changes and a Safety Evaluation/Determination of Significant Hazards Considerations. Exhibit B contains the pages of the Monticello Technical Specifications marked up with the proposed changes. Exhibit C contains the revised Technical Specification pages. Exhibit D contains a sample Core Operating Limits Report for Cycle 14.
